

Magna Property Services – New Website

Client Profile

Magna are a full-service property maintenance company. They specialise in all types of interior and exterior works, from plumbing, electric and gas installations (also fault-finding and certifications), new kitchens and bathrooms, exterior building and Landscape work – to everyday tasks and much more.

Client Brief

Magna approached us as they currently had no website for the company. They had previously had another company start the design, but it was never finished and ultimately they weren't happy with it. We were tasked with building a new site from the ground up and then hosting it on our platform. They would also like their email boxes and addresses moved over to ITP

ITP Solution

We worked along side Magna to build a stylish and modern looking site which incorporates all the company information for clients to see. When then hosted the site on our fast and reliable hosting platform. We are now set to start working on promoting the site with search engine optimisation and Google Ads.

As well as the website we have now put Magna's mailboxes and emails onto Office 365.

Business Benefits

- A new site to show off their current work to new and existing customers
- The ability to drive new traffic and customers to the site
- Email hosting at Office 365 gives them a fast and reliable service.

Key Equipment and Services Supplied

- A brand new website built from the ground up
- Email hosting on the Office 365 platform
- Ongoing SEO and Google PPC work
